Utilise unrivalled management tools for your professional alarm signalling base

- The Radio variant uses our patented 4G Roaming WorldSIMs.
- The Radio variant also comes with a standby SIM as a backup to safeguard your system. Both SIMs operate on an independent network from the other for total resilience.
- 2 outputs & 8 inputs are available as standard.
- Dial Capture on-board as standard (including UDL).
- Also available as a LAN variant, for areas with limited 4G coverage.
- Compatible with our handy Installer App, My Base. Take control of your signalling devices with My Base. Download it today from your relevant App store!
